- 6 800-205 brake rodding ponies with spring plate

When ordering parts please quote the catalogue number together with the livery of the model (if appropriate) and number of the part required.

Parts are subject to availability.

General

The Mechanism of this model requires running in (without a load) for approximately half an hour in each direction at a moderate speed, to allow the gear train to bed in.

When required, sparingly lubricate the motor bearings using plastic compatible light oil and the gear train with model grease.

Bachmann Branchline locomotives perform best on curves of second radius or greater (approx. 18 inches / 450 mm).
